EMPLOYMENT:

L3Harris

March 2020 – Current

Senior Supervisor, Software Engineer

- Create software solutions for EO/IR camera systems and interfaces. Operating on Windows systems using C, C++, & C# in Visual Studio
- Lead Scrum teams utilizing tools like Jira, GitLab, Artifactory. Manage backlog, story creation, drive feature changes by collecting information from end users
- Functional Manager of ten employees: performance reviews, 1:1s, goal setting
- Create/Maintain technical documents: Software Development Plans, User Guides, etc.

Fast Enterprises

June 2018 – March 2020

Implementation Consultant

- Worked directly with State Officials to define system requirements
- Regularly lead tag up meetings with the customer to demonstrate newest implementations
- Wrote software and had full life cycle participation. Creating timelines, defining product functionality, development, testing and release
- Developed materials for end user education and training

Schweitzer Engineering Laboratories

April 2017 – May 2018

Project Management Intern

- Worked as Project Manager on multimillion-dollar feeder protection relay release:
 - Owned project schedule - Conducted interviews to understand work and created estimates that were built out into a project timeline. Regularly held status meetings to monitor schedule
 - Managed team budget - Created budgets based on estimated man hours, quotes for prototyping, and cost analysis on initial scale production. Owned and monitored budget through product lifecycle
 - Coordinated meetings for a geographically disbursed team
- Headed team training during transition from Microsoft Project to JIRA
- Worked on risk mitigation projects such as identifying and securing deprecated parts. And spinning up multiple mini projects to analyze viability of new parts.
